

CORE

Collaboration of
Organized and
Recognized Endoscopy
units (CORE)

- WEO recognizes endoscopy units performing upper intestinal endoscopy and/or colonoscopy.
- Open to all sizes of endoscopy units, from multiple-room facilities to single-physician private offices
- 18 CORE members to date

Network & Collaboration

ADEC

Advanced Diagnosis
Endoscopy Course &
Library

- 1-day course advances diagnostic skills with the aid of high definition endoscopes
- Highly interactive program with simultaneous voting
- Library featuring lectures on new technologies, images for diagnostic references

Teach & Train

EMERGING STARS

- Established program to train next generation of endoscopy leaders
- Three training modules (6-7 days each)
- Intensive face-to-face training
- Program can be completed between 15 and 18 months

Teach & Train

ENDOSCOPY TOUR

- New program offering the most popular WEO training activities at different locations
- Intensive face-to-face training with WEO experts
- 1-2 days program

Teach & Train

FELLOWSHIP PROGRAM

- For fully trained endoscopists
- Initially focusing on ERCP training, 1-2 training modules per year
- Currently seven high volume Chinese endoscopy center as host units
- Fellowship offers valuable opportunities for professional development

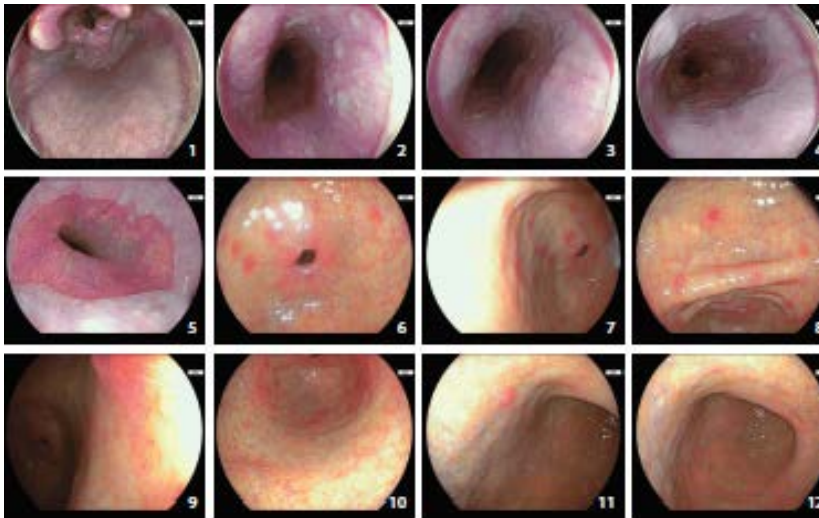

Teach & Train

HIGH-Q

High Quality in Upper
GI Endoscopy Course

- Fundamentals for performing high standardized upper endoscopy
- Highly interactive with simultaneous Q & A voting system

Teach & Train

TRAINING CENTERS

- Promote training and education in developing countries
- Centers serve as regional hubs for training endoscopists and endoscopic practice in their region
- WEO to expand training center concept into Latin America

Teach & Train

PET

Program for
Endoscopic Teachers

- Train-the-trainers course designed for leaders of endoscopic training program
- Program includes didactic presentations, breakout group discussions, and hands on instruction on use of simulators for teaching endoscopy

Teach & Train

VCE

Video Capsule Endoscopy Training

- Course designed to understand the indications and practical aspects of video capsule endoscopy
- Program includes how to use VCE procedures in daily practice from basic concepts, diagnosing obscure bleeding and inflammatory small bowel diseases to creating reports using Minimal Standard Terminology (MST)

Teach & Train

WISE

WEO International
School of EUS and EUS
WISE Workshops

- 3rd WISE program opened on September 30, 2019
- Focus on young doctors (age 30-45)
- Intensive face-to-face and remote training: basic anatomy, intermediate/advanced skills of EUS hands-on
- EUS WISE Workshops in relevant meetings worldwide

Teach & Train

CRC SC

Colorectal Cancer (CRC)
Screening Committee

- Global initiative focused on the science and practice of colorectal cancer screening
- Promoting of international implementation of CRC screening programs
- Well-established annual CRC SC meetings organized worldwide

Science & Research

RESEARCH WORKSHOP

- Half-day workshop on how to start endoscopic research activities
- Forum for discussion and networking
- Main focus on endoscopy research design and methodology
- 40-50 participants per workshop

Science & Research
